# Behind-the-scene story of the development

## The Pruning Shears designed from Innovations Rooted in Observation

We visit various fields all over the world to observe the users in action and to gather insights that shaped the design of our new pruning shears.

We focused particularly on safety, rounding the tip of the counter blade to reduce the risk of injuries when it is not in operation.

Additionally, we combine the unique locking system which enables the single-touch stopper to enhance useability and quick resume of work

Our products combine ease of use, safety and efficiency and are designed based on direct user feedback, creating the pruning more pleasant.

| Model | Overall Length | Blade Length | Weight | Surface Finishing  | Blade Material    | Grip Material | Web page   |
|-------|----------------|--------------|--------|--------------------|-------------------|---------------|--|
| FB-7  | 181 mm         | 47 mm        | 180 g  | Hard-Chrome Plated | High Carbon Steel | PVC           |  |
| FB-8  | 203 mm         | 54 mm        | 200 g  |                    |                   |               |  |
